DEKTITE Premium has a low profile square base with watershed sleeve. It improves water run off and protects the silicone sealant. It has a larger base and will cover a larger opening. As a result, it is more forgiving for penetration openings and allows for steeper roof pitch. The unique cone design provides 10mm of continuous contact with flashed pipe providing a watertight seal. The boot has clear markings in metric and imperial measurements making it easier cutting to pipe size.

Dekstrip® expandable-edge flashing is the answer to flashing large, curved or awkward profiles and penetrations. It's ideal for square ducts, chimneys, and skylights and is the fast, easy, and most effective way to flash a bullnose. Flashes hi-rib & standing seam profiles. Stretch and form to fit and seal. Flash between dissimilar materials. Handles vibration and expansion.
